

March 2020

SDQ is staying on top of the latest information regarding COVID-19.

SDQ's top priority is to keep our customers clean 24/7. SDQ also wants our customers to stay healthy! SDQ uses disinfectants that are helpful in combating Coronavirus Disease (COVID-19) as well as the flu. Prioritization during virus outbreaks should be given to commonly touched surfaces. SDQ is making sure that our teams are disinfecting touchpoints, like countertops, door knobs, handles, etc. Consistent cleaning is one of the key components to COVID-19 and other flu virus prevention and control.

Employees can do their part by washing their hands with soap and water, and by wiping down keyboards, mouse pads and phones. Most importantly, employees should always stay home when they are ill.

If you would like a quote on deep cleaning your building or a specific area in your building please contact us at 952-929-5263
